PROFESSIONAL SUMMARY

Technical Solutions Specialist with 3+ years of client-facing technical support and operations experience, including e-commerce, resolving complex store and system issues and bridging clients and development teams. Designed and built 10+ interactive UI prototypes in HTML, CSS, and JavaScript, plus three e-commerce storefront themes now live on the Markatty platform. Builds modern frontend interfaces with React, Next.js, and reusable components, and is developing DevOps foundations (Linux, Docker, Jenkins). Available to start immediately.

PROFESSIONAL EXPERIENCE

Operations & Frontend Developer | NTG Clarity – Markatty *Mar 2025 – Present*

Cairo, Egypt

- Own high-priority and complex client store issues end to end (~3 cases per week), resolving ~70% independently without escalation, including custom CSS, mobile responsiveness, and spacing and layout issues.
- Work directly with 10+ clients who need urgent fixes or developer-level attention, clarifying requirements and recommending practical changes to their store setup.
- Investigate root causes and hand off well-documented requests to developers when a code change is needed.
- Designed and built 10+ interactive UI prototypes in HTML, CSS, and JavaScript, with animations and real user interactions, so clients and developers can review the experience without any tools.
- Built three e-commerce storefront themes now live on the platform, including full pages and all components in React and Next.js; the Frontend team handled publishing.

Account Manager | Dentolize – Dental Clinic Management System *Apr 2023 – Feb 2025*

Cairo, Egypt

- Managed relationships with 15 dental clinics, resolving issues by phone, AnyDesk remote sessions, and onsite visits.
- Resolved ~4 technical issues per week, including device problems, system startup failures, and date/time configuration errors, mostly through remote sessions.
- Onboarded and trained 30 clinics (doctors and staff), in person and via Zoom or Google Meet, driving feature adoption.
- Reported bugs to developers with full details and followed up on fixes, updates, and rollouts.

CORE SKILLS

E-commerce Operations: Store operations, complex issue handling, client coordination, subscription support, workflow improvement

Technical Solutions & Support: Troubleshooting, root-cause analysis, bug reporting, remote support (AnyDesk), requirements clarification, cross-team coordination

Frontend & UI Prototyping: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Bootstrap, responsive layouts, animations, reusable components

Tools & Data: Git, GitHub, Excel (PivotTables, Power Query)

Languages: Arabic (Native), English (Good)

DevOps (Learning): Linux fundamentals, Docker basics, Jenkins basics, CI/CD fundamentals

PROJECTS

United World Foundation Website | Markatty Client Project | uwf-eg.org/en
Designed and built a live bilingual (English/Arabic) website for a non-profit organization, with areas of work, success stories, archive, contact, and donation sections, using React and Next.js.

E-commerce Storefront Theme | HTML, CSS, JavaScript
Complete one-page storefront theme in standard HTML, CSS, and JavaScript, framework-independent and easy to adapt to React or Next.js.

Educational Center Management System | Graduation Project (2020–2021)
Academic project for educational-center management and learning-material access, built with HTML, CSS, and JavaScript.

Personal Profile Website
Personal website presenting skills, services, and contact information, built with HTML, CSS, JavaScript, and Bootstrap.

TRAINING

DevOps Course | eYouth Learning Platform – In Progress. Linux, Docker, Jenkins, and CI/CD fundamentals, with hands-on practice in Linux and Docker commands.

EDUCATION

Bachelor of Computers and Management Information Systems (MIS) | New Cairo Academy, Cairo *June 2021*

Mandatory Military Service, Egypt – Completed (2021 – April 2023)
